

# SECJ3483

2023/2024 – 2

Assignment 1

# Instructions/Guides

Install XAMPP (Apache + PHP + Perl + MySQL) and then create local directory:

```
D:\HTTPD\webtech\public_html\assg1
```

Copy incomes.php and expenses.php files into the above directory and then configure Apache main configuration file (httpd.conf) as follows:

```
. . .  
. . .  
<IfModule alias_module>  
    . . .  
    Alias /webtech D:/HTTPD/mwp/public_html  
</IfModule>  
. . .  
. . .  
<Directory "D:/HTTPD/*/public_html">  
    Options Indexes FollowSymLinks Includes ExecCGI  
    AllowOverride All  
    Require local  
</Directory>
```

# Instructions/Guides

Two services to get monthly incomes and expenses then should be made available from the following URLs:

- <http://localhost/webtech/assg1/incomes.php>
- <http://localhost/webtech/assg1/expenses.php>

Examples of URLs to retrieve monthly income and expense data in January:

- <http://localhost/webtech/assg1/incomes.php?month=1>
- <http://localhost/webtech/assg1/expenses.php?month=1>

# Instructions/Guides

Complete jQuery and AJAX implementation inside [assg1.html](#) to retrieve incomes and expenses data from January to December by using the services described in the previous slide. All AJAX connections should be made in asynchronous mode. Below is the expected output of the implementation.

Month	Income	Expense	Balance
Jan	5453	4726	727
Feb	5453	4679	774
Mar	5453	4764	689
Apr	5453	4572	881
May	5453	4583	870
Jun	5453	4460	993
Jul	5453	4501	952
Aug	5453	4582	871
Sep	5453	4552	901
Oct	5918	4560	1358
Nov	5352	4235	1117
Dec	5651	4502	1149
<b>TOTAL</b>	<b>65998</b>	<b>54716</b>	<b>11282</b>
